

FS 20 – Semi-Automatic Shirt Folding Station with Tuck-In Device

Overview

The FS 20 Semi-Automatic Shirt Folding Station with Tuck-In Device is designed for fast, consistent and premium-quality folding of men's, women's and children's shirts. Its ergonomic layout, height adjustability and flexible accessories make it ideal for garment factories, laundries and finishing units requiring high presentation standards.

Key Advantages

- **Universal Seamless Collar Former:** Adapts automatically to various collar sizes, gives a perfect shape, applies uniform heat without marking or damaging the label.
- **Highly flexible folding system:** Suitable for different styles, qualities and fabrics across all shirt categories.
- **Height-adjustable station:** Offers an ergonomic working position for any operator.
- **Adjustable shelves and accessories:** Supports left- or right-hand operation for maximum workflow efficiency.
- **Wide table top with button groove:** Ensures easy handling and accurate shirt placement.
- **Shiftable and adjustable folding template:** Allows quick size changes and consistent fold dimensions.
- **Digitally controlled heating:** Temperature can be precisely set to match fabric requirements.
- **Collar shape customization:** Easily adjust between round oval, long oval or wide oval collar profiles.

Applications

Ideal for garment manufacturers, laundries, uniform suppliers, and apparel finishing operations looking to enhance presentation quality, reduce manual handling time and maintain consistency

across high volumes of folded shirts.
